ABOUT US

French manufacturer of international renown

Bewell Nutraceutique develops and manufactures health supplements for brands, laboratories and distributors worldwide. Part of Essendi Group, we combine French industrial standards with an integrated service — from formulation to finished, market-ready product.

Two manufacturing sites in France, One in Spain and a commercial & raw-material sourcing office in Vietnam give our partners a direct bridge between European quality and Asian markets.

Particle size

Density (densimeter)

Loss on drying

Thickness

Friability

Certifications

EU regulations, overseen by the EFSA (European Food Safety Authority), are among the strictest in the world: they require rigorous scientific validation of every health claim and full traceability.

In France, ANSES's nutravigilance system ensures a unique post-market safety monitoring programme, making 'Made in France' a guarantee of absolute reliability.

Made in France

RESEARCH & DEVELOPMENT

Two ways to work with us OEM & ODM

OEM – we manufacture your own formula, to your specifications.

ODM – we develop the product for you, from our R&D expertise to a ready-to-market formula

From your idea or from ours, our R&D team turns the concept into a compliant, industrially feasible product.

One partner, one contact from your first idea to your market-ready product.

Because a good product start from a good raw material. Bewell Nutraceutique has developed an AI assist system in order to source the very best raw materials. We have over 300 suppliers based around the world. Our policy is to source directly from manufacturers to ensure the quality and availability of materials.

Our three buyers and five R&D engineers work together to develop high-quality formulations.

By growing alongside Europe's leading pharmaceutical brands, Bewell has reached the highest standards of quality

ALL-IN-ONE service

Brief & needs analysis

Sourcing & formulation

ingredient selection, scientific analysis, bench trials, formula validation

Sourcing & purchasing

raw-material selection, traceability, logistics

formulas
developed

HARD CAPSULE

Protection, comfort and precise release. A smooth, easy-to-swallow format, the two-piece capsule shell shields sensitive actives from moisture – preserving their potency throughout shelf life – while keeping the formula isolated to prevent interactions between ingredients. Its controlled disintegration time ensures the actives are released at the right moment, for reliable bioavailability.

Type	T2	T1	T0	T00
Size	 6,3*18 mm	 6,6*19 mm	 7,5*21 mm	 8,2*23,4 mm
Weight capacity (depending on density)	220 – 290 mg	300 – 390 mg	400 – 540 mg	550 – 650 mg
Material	HPMC vegetarian – Gelatin – delayed-release			
Color	Clear – white – Beige – Red – Green – Clear blue Your logo or any text on the capsule starting at 2 millions			

> 7 automatic and 5 semi-automatic capsule-filling machines manufactured in Europe, originally used in the pharmaceutical industry.

> Minimum Order of Quantity :
300 000 units

> Mensual Capacity :
100 M° of capsules

TABLET

Versatility and brand identity. The tablet offers far greater freedom of shape, colour and taste, while protecting and releasing its actives just as reliably. You can even invest in your own tooling (punches) to create bespoke tablet formats, unique to your brand.

Type	Round curved	Round flat	Breakable stick	Large oblong	Oblong
Size	 6mm 10mm 12,5mm	 18mm 23mm	 7,2*19,5mm 7,8*21mm	 8*22,5 mm	 9,6*15,6mm 8,5*19mm
Weight capacity (depending on density)	150mg 400mg 500mg	2000 mg 2500 mg	1000mg 1200mg	1600mg	600mg 1200mg
Coating color	Clear – white – Brown – Red – Yellow – Blue – Green				
Option	Chewable ; effervescent ; orodispersible				

> **4 automatic presses manufactured in Europe**, originally used in the pharmaceutical industry, and 1 laboratory press.

> **Mensual Capacity :**
50 M° tablets

> **Minimum Order of Quantity :**
300 000 units

PACKAGING

Every format, every material. We package tablets, capsules and softgels in virtually any format and material found on the market. our multiple packaging lines are highly flexible — bottles and blisters with automatic cartoning — and adapt to the widest range of packaging solutions, from the first unit to the largest run.

Clip-on bottle 	50ml to 750ml PET, PEHD, rPET IHS sealing White, Amber, Black, Clear, Orange, Green, Blue	Maximum protection, fully customisable. Pill boxes offer the highest level of protection and durability for capsules, softgels and tablets, with full customisation of material, design and colour. Every cap features an induction heat-seal liner for an optimal barrier against moisture.
Screw-cap bottle 	50ml to 750ml PET, PEHD, rPET IHS sealing White, Amber, Black, Clear, Orange, Green, Blue	
Blister 	10 to 20 units per blister Alu/PVC/PVDC 350µ Clear or White	Individual protection, on the go. Blisters are ideal for packaging tablets, capsules and softgels unit by unit. They make the product easy to carry and keep every dose fully protected against moisture — even once the pack has been opened.
Box 	Automatic printing and cartoning	Your brand, beautifully boxed. Our cartons are fully customisable — dimensions, colours and graphic finishes — and made from thick, high-quality board, with a choice of matte or glossy finish.

> **MOQ:**
5 000 sku

POWDER

High doses, endless formulation freedom. Powders are the format of choice for high daily doses that would be impractical in capsules or tablets. They open up virtually endless possibilities of flavour, texture and nutrient combination – for products that are as effective as they are enjoyable to take. Our R&D team brings deep expertise in developing this demanding format, and our modern production tool guarantees total homogeneity and impeccable quality, batch after batch.

Shape	Sachet (unit dose)	Pot	Doypack
Size	45x35mm To 100x100mm	Diam : 9mm Various height	Custom
Weight capacity (depending on density)	1g to 10g	150g to 1kg	75g to 1,5kg
Material	Paper/PE/Alu/PE PE/Alu	PEHD PELD PET	PET/Alu/PE PE/EVOH-PE
Option	Printed box ; spoon ; Multi-layer label ; dessiccant		

> Minimum Order of Quantity :

- **Sachet** : 50 000 units
- **Pot** : 2 000 units
- **Doypack** : 2 000 units

LIQUIDS

A modern, versatile format. In liquid form, certain actives are absorbed faster and with greater bioavailability — particularly fat-soluble vitamins, as well as a broad range of other nutrients. Liquids also offer wide scope for customisation of taste, texture and format, meeting the expectations of today's consumers. Using advanced production methods, we guarantee consistent quality and stability in every bottle and flask.

Shape	Spoid	Dropper	Bottle
Size	10 to 30 ml	10 to 30 ml	100 to 500 ml
Material	PET Glass		
Option	Printed box ; measuring cap ; Multi-layer label		

> Minimum Order of Quantity :

- **Spoids:** 5 000 units
- **Dropper :** 5 000 units
- **Bottle :** 2 000 units

CONTACT US

Behind every project there are people — and that's how we like to work. At Bewell, every client matters, whatever the size of the project. We take the time to build genuine, lasting relationships, because we believe great products start with real human connection.
